

The Jericho family of pistols combines meticulous design with a variety of features to create a pistol that offers outstanding performance. Some of the important Jericho pistols features include: High quality all steel construction, polygonal rifling for greater accuracy and longer barrel life, Center of gravity placed forward to reduce barrel jump and many others. The Jericho comes in two distinct groups: steel and polymer and various calibers.

Polymer Frames - Specifications

Pistol models	941 FL/RL		941 FSL/RSL		941 FBL/RBL	
	9 X 19	.40 S&W	9 X 19	.40 S&W	9 X 19	.40 S&W
Operation	Semi-auto, short recoil system					
Trigger mechanism	Single or double action					
Decoker mechanism	FL, FSL, FBL - No		RL, RSL, RBL - Yes			
WEIGHT (gr)						
Pistol w/o magazine	800		720		680	
Loaded magazine	282	275	282	275	250	230
DIMENSIONS (mm)						
Overall Length	207		192		185	
Height	138		138		122	
Width	38		38		38	
Barrel length	112		96		89	
Magazine capacity	16	12	16	12	13	10
Rifling	6 RH grooves. Polygonal grooves - optional.					
Sights	Combat type, tritium sight - optional					
Integral rail (MIL-STD1913)	Yes		Yes		No	

Steel Frames - Specifications

Pistol models	941 F/R		941 FS/RS			941 FB/RB	
	9 X 19	.40 S&W	9 X 19	.40 S&W	.45ACP	9 X 19	.40 S&W
Operation	Semi-auto, short recoil system						
Trigger mechanism	Single or double action						
Decoker Mech	F, FS, FB - No			R, RS, RB - Yes			
WEIGHT (gr)							
Pistol w/o magazine	1000		900	1025	860		
Loaded magazine	282	258	282	258	310	250	230
DIMENSIONS (mm)
